

Pam Padgett
Wyoming Rep

Pam has been playing bridge since the 60's but has only played duplicate for 7 years. She travels quite a bit with my husband, Guy, and they usually try to find a tournament to play in - either on the way or at the destination.

Pam taught Mathematics and Computer Science at the college level since the early 70's. Since moving to Wyoming she teaches online classes in the same subjects. She is looking forward to meeting new people in her new position on the District Board.

Be sure to introduce yourself the next time you sit down to play at her table.
